VI

THE HARROGATE COLLECTION

Welcome to an elegant approach to bathroom design. This very special range reflects Harrogate's unique style. The Yorkshire town became synonymous with its water thanks to the discovery of natural sulphur springs in 1571, attracting hundreds of thousands of visitors from across Europe and growing it from a small village to a vibrant Victorian health cure destination.

The town motto is ***Arx Celebris Fontibus***, which means 'a citadel famous for its springs'. Inspired by its namesake, The Harrogate Collection combines bathing with an inspired feeling of wellbeing.

Our family business was already well-established by the time Harrogate visitor numbers peaked in the early 1900s. We worked with Thomas Crapper in the late nineteenth century to bring his plumbing and sanitation inventions to Yorkshire, and our commitment to innovation and design remains strong today.

BRUNSWICK FURNITURE	8 ~ 27	BRASSWARE	58 ~ 61

YOUR OWN UNIQUE COLOUR	48 ~ 49	FURNITURE CARE GUIDE	82
MIRRORS	50 ~ 51	GUARANTEE INFORMATION	83
SANITARYWARE	52 ~ 57		

YORKSHIRE HERITAGE

All our products are designed in Yorkshire.

The names of our product ranges reference pretty Nidderdale villages, as well as the Harrogate streets that were made for a perfect promenade after taking the waters.

Classical looks that create grace and charm

VICTORIAN CHARM

First opened in 1897, the Turkish Baths in Harrogate remains one of the town's most popular attractions. This spectacular Victorian creation was originally one of many baths made in this ornate Moorish style. Today, it is the most well preserved and fully restored facility of its kind. Just like our bathing collections, the experience of the traditional Turkish Bath ritual promotes a sense of absolute cleanliness and total relaxation.

Relax in a sanctuary of peace and tranquility

Hand Crafted Furniture

Our furniture is crafted using modern production techniques and are hand finished to perfection. The combination of timeless design and contemporary construction creates a collection that will make a masterpiece of any bathroom.

22mm Thick Reinforced Carcass

One of the key features of our traditional furniture is the construction of our carcasses. With our 22mm carcass and reinforced structure we excel over most of our competition offering superior rigidity and longevity.

Door Construction

We are one of the only bathroom furniture manufacturers to use a five piece door construction. This is the traditional way of building high quality furniture that emphasises the beautiful detail in our Harrogate furniture. Our 24mm thick doors have a premium feel. Once you've seen and felt this quality we are confident you will select our range of furniture for your new bathroom.

Paint Finish

Our furniture comes in four refined traditional colours that can be carried through with matching colours on WC seats, baths and bath panels, to give a complete look to your bathroom. Each piece is painted multiple times to give a rich colour that protects the furniture for years to come.

Built to Last

All our products are made from durable materials that stand the test of time.

Rigorous Product Testing

All our products are rigorously tested and quality checked at our factory to meet our exacting standards. Our quality team are so confident of the quality of our products that they label the furniture with their signature.

Water Resistant Furniture

Our furniture is crafted using a water resistant high density wood and finished with multiple paint layers to reduce the chance of water penetrating the furniture.

Minerva® Solid Surface Basins and Countertops

Minerva® surfaces are a solid work surface material that delivers a luxurious appearance and robust performance. Manufactured in the UK using state-of-the-art technology style is not compromised for quality.

Double Skinned Acrylic Freestanding Baths

Our bath range is double skinned with fibre reinforced acrylic to make your bath as strong as it can be, giving it an unsurpassed life span.

Guarantee

All Harrogate products offer the ultimate in quality, precision, and craftsmanship. To give you complete peace of mind, all our products are accompanied by a lifetime guarantee.

BRUNSWICK

Our Brunswick luxury bathroom range contains a perfect blend of clean lines and minimalist detailing, coupled with Victorian-inspired design features. This classic collection comprises elegant hand-painted units and a selection of ceramic and matt finish basins, all of which have been meticulously constructed using traditional handmade production techniques.

Brunswick also offers three timeless colour options in order to seamlessly integrate your luxury bathroom with the rest of your home.

DUCHY

With its timeless blend of contemporary clean lines and updated Victorian-style features, the Duchy collection perfectly embodies the ideal luxury bathroom for the modern home. It features a versatile selection of handmade and hand-painted furniture, with two different matt finish basin options and three colour schemes to choose from. This range has been carefully crafted using traditional joinery techniques and incorporates an exquisite design that will truly stand the test of time.

YOUR OWN UNIQUE TOUCH

The furniture in the Harrogate Collection is beautiful just as it is. However, if you would like to add your own unique touch, we have created the Arctic White units in a way that means you can paint them in a colour of your choosing.

Let your imagination run wild when you select the colour that suits your own personal style. Whether your palette requires something neutral or something bold, there are many colour combinations that can be applied, allowing you to create a tailored bathroom that is totally you.

ARCTIC WHITE FURNITURE READY TO
PAINT IN YOUR OWN COLOUR

MIRRORS

The Harrogate Collection features two very different types of mirror. For something lavish, the Victorian-style mirror perfectly complements an ornate bathroom and comes in a choice of chrome or aged brass to match your brassware. If you prefer the classic framed mirror, we have created two styles in a choice of four colours designed to seamlessly integrate with the rest of your furniture.

BRASSWARE

Our Victorian-inspired taps combine polished design with contemporary production techniques. Choose from either high-quality chrome-plated or luxurious brass taps to finish your bathroom in style. The PVD coating on our brass collection encourages a longer-lasting finish for your taps, meaning you can relax in the knowledge that your bathroom will stand the test of time.

TWIN HARROGATE
CONCEALED VALVE

CONCEALED001	£270
PLATE001	£75
Combined	£345

- Easy to operate - the top control turns the water on and off and the bottom control adjusts the temperature.
- A simple shower solution - the twin shower will operate one shower accessory, choose a fixed head or a slide rail kit.
- Protection against accidental scalding.

TWIN HARROGATE
CONCEALED VALVE
WITH DIVERTER

CONCEALED005	£330
PLATE005	£105
Combined	£435

- Easy to operate - the top control is the diverter to switch between your shower accessories and the bottom control adjusts the temperature
- A flexible shower solution - the twin with diverter shower allows you to have two shower accessories, and diverts between them according to your preference.
- Protection against accidental scalding.

TRIPLE HARROGATE
CONCEALED VALVE

CONCEALED003	£330
PLATE002	£95
Combined	£425

- Easy to operate - the top control operates one shower accessory, the centre control adjusts the temperature and the bottom control operates the other shower accessory.
- A flexible shower solution - the triple shower will operate two shower accessories, you can choose to run them separately or run two at the same time.
- Protection against accidental scalding.

TRIPLE HARROGATE
CONCEALED VALVE
WITH DIVERTER

CONCEALED007	£390
PLATE006	£135
Combined	£525

- Easy to operate - the top control diverts between two shower accessories, the centre control adjusts the temperature and the bottom control operates a shower accessory - enabling you to have three shower options.
- A flexible shower solution - the triple with diverter shower will operate three shower accessories, you can choose to run them separately or run two at the same time.
- Protection against accidental scalding.

BATHROOM FURNITURE CARE GUIDE

On receiving your order all product must be checked visually for defects. Any defects should be reported within 3 working days.

Installation of the product is regarded as acceptance of quality, any damage claims would not be accepted by the supplier.

The following care guide will help to ensure the longevity of your product.

1. All bathroom furniture is water resistant NOT waterproof
2. Should any of your items have a defect, please do not install as returns will not be accept once fitted.
3. Use a qualified person to install your units, as any issues relating to poor fitting will not be accepted by the supplier.
4. You have purchased a handmade and in some cases hand painted product. Therefore, you may see some slight imperfections which the supplier may deem as acceptable.
5. Please avoid direct sunlight as this will cause the painted surfaces to discolour.
6. Due to motion in transit, the cabinet doors and drawers may need to be adjusted after installation
7. Wall hung units must be secured back to the wall using the wall hanging brackets supplied.
8. When fixing to a stud or panelled wall, appropriate framework should be installed to support the basins and units.
9. Where units or worktops have been cut out for services, all raw edges MUST be sealed against water ingress.

TEMPERATURE, HUMIDITY, VENTILATION

Avoid excessive change in temperature, or installation in direct sunlight. Ensure the product is a reasonable distance away from a source of high humidity such as showers, baths, or steam appliances, to ensure the unit does not come into regular contact with water. We would advise an extractor fan to be installed in all bathrooms which include furniture to reduce the chance of water ingress damage. The extractor fan should be used every time that the shower/bath is used and should be left switched on for a sufficient time afterwards to allow for adequate ventilation. Ensure the fan has been correctly sized for the room in use. Ensure furniture is not installed in a wet room environment in which the unit can be submerged at any point.

WATER OUTLET CALIBRATION

Taps and other outlets cannot be calibrated through manufacturing to suit all basin types, and thus must be calibrated by an installer. Correct installation must not allow water to splash outside the internal bowl of a basin during normal use. A tap should have its flow reduced to allow a tap to be fully open without over splashing.

REGULAR INSPECTION OF HYDRAULIC SYSTEM

Internal plumbing and waste systems should be checked regularly for leaks, at minimum biannually.

SPILLAGE

Any spillage must be immediately dealt with using a damp cloth and any residue wiped up with a dry cloth. Under no circumstance should water be aloud to stand on the surface of the product.

MELAMINE, VINYL AND FOIL WRAPPED DOORS

Occasional marks, can in most cases, be removed with a soft damp cloth. More persistent marks can be removed using a non-silicone-based furniture cleaner. Hot soapy water should be avoided. Once the mark is removed, the area should be wiped over with a damp cloth to remove any excess and dried with a soft clean cloth. On no account should solvent or an abrasive cleaner be used as permanent damage to the finish could take place.

HIGH GLOSS DOORS

Use a cleaning product not containing aggressive substances like acetone, alcohol, bleach etc. as those components could seriously damage the surface of the door. The best would be to use a soft cotton or micro fibre cloth with only water and a soft soap (containing a maximum 1% of liquid soap)

CARCASS COMPONENTS

Do not use polish on any surfaces. A damp cloth with soapy water will clean off most marks or spills. On no account should any spillage, even water, be allowed to lie of the surface. Bleaches, scouring pads, and multi-surface cleaners should not be used.

DRAWERS, RUNNERS, DOOR HINGES.

These should be wiped out with a damp soapy cloth and wiped dry with a soft cloth as necessary. The roller runners and hinges are lubricated and should not be cleaned with a degreasing agent as this will affect the action of the moving parts. Never lean on partially or fully opened doors and drawers in order to gain access to the units. The hinges are specified to adequately support the weight of the door, plus small additional weights such as wire accessories. It is advised that once the bathroom has been installed, you should check every six months that all screws on the hinges are tight.

WORKTOPS

Although the worktop is hard wearing, sharp objects will scratch, and excessive heat will scorch the surface. Care should be taken not to drop any heavy objects onto the worktop as the surface may crack. For cleaning, a damp soapy cloth with clean off most spills. Bleaches, scouring pads and multi-surface cleaners should not be used. Corrosive liquids and make-up should be wiped off immediately. On no account should any spillage, even water, be allowed to lie on the surface.

REGULATIONS

If it is your intention to remove and replace your bathroom fittings with 'like for like' units, then this is classed as 'non-regulated' and no building regulations would be required. However, building regulation approval may be required if the bathroom refurbishment involves altering the drainage or the internal layout within the dwelling to accommodate the new fitting such as a second bathroom. In this instance, we would advise you contact the building control department at your local authority to discuss the need for a formal building regulation application Macerator – current building regulations specify that a Sani pump smallbore system can be fitted in a dwelling where there is also a normal gravity discharge W.C. it should not be the only W.C. facility. Electrical – remember that double pole isolating switches are required for all electrical points apart from special razor sockets. All work must conform to BS7671:2008 the current I.E.E. regulations.

LIFETIME GUARANTEE

TERMS & CONDITIONS – (UK & EIRE ONLY)

The lifetime guarantee is available to customers who complete the Harrogate Guarantee Registration Form Online within 30 Days of installation. Please visit our website www.harrogatecollection.com/guarantee to complete this form.

Harrogate products are made using the highest quality materials, we strive to ensure all our products meet or exceed U.K. & European industry standards. With correct installation and care our products will give many years of service.

To meet the criteria of our guarantee please ensure all relevant Building regulations are observed and the products are used for there intended purpose. Where applicable follow installation instructions provided.

The guarantee covers manufacturing or material defects. In the event of a failure within the guarantee period, a free replacement or replacement part will be supplied. Liability is limited to the product and does not cover damage during installation or consequential loss.

We constantly work to improve our products, in some cases a product may become obsolete, if this occurs, we will offer the closest alternative in event of a failure under the guarantee.

Normal wear and tear, lime scale, and chemicals used during cleaning can cause damage and deterioration and this is not covered by the guarantee. Products should always be used in the way they are intended and not misused or abused.

We will not accept any claims for replacement if the product has been modified in any way other than shown within in the installation instructions.

Moving parts or parts which are likely to perish or wear over time with normal usage (such as rubber seals, ceramic disc valves, mixer cartridges and thermostatic valves) are not covered by our lifetime guarantee and are subject to a 1-year warranty. Beyond the warranty period these parts may be available for purchase.

All furniture is water resistant, and not waterproof, all care must be taken to avoid water ingress. Do not place within an area which may be subject to flooding (e.g. wet room environment). Any spillage must be immediately removed, under no circumstance should standing water be left. The room must be adequately ventilated to building regulations.

CLEANING

Unless otherwise stated, we recommend all products should be cleaned with a soft damp cloth with warm PH neutral soapy water only. The product must then be rinsed with clean water to dilute any soap, then polished and dried using a soft dry cloth, after every use.

HOW TO CLAIM UNDER OUR GUARANTEE

For products under 1-year old you must first contact your place of purchase. For products more than 1-year please contact us directly with your proof of purchase. We will endeavour to supply the replacement part / parts required, subject to exclusions. E&OE

Conditions of all guarantees

1. The guarantee applies to products purchased and installed within the U.K. & Eire

2. All products must be installed by qualified professionals and evidence of this will need to be provided to support any claim

3. Proof of purchase is required to support a claim

4. The product must be available for our inspection and should not be removed or destroyed without our consent. We may also request photographic evidence.

5. The product must be installed, cleaned, and used in accordance with our instructions and installed in line with good plumbing and electrical fitting practice e.g. flushing pipework before installation.

6. Some products are hand finished and may have minor imperfections. Furniture and some metallic finishes may be subject to colour change over time due to either natural ageing or the impact of direct sunlight. This is not considered to be a product failure, associated claims for damage will not be accepted.

7. Claims for damage caused by water ingress will not be accepted if the product is not properly maintained.

8. Claims for products not performing due to insufficient water pressure will not be accepted, all our brassware requires a minimum 0.5bar working pressure unless otherwise stated.

9. If a product is faulty due to a manufacturing or materials failure we will at our discretion, (a) repair, (b) supply a replacement product, (c) provide suitable part free of charge, or (d) refund at purchase price.

10. We will not be liable for the replacement of other products within the room as a result of any Harrogate Collection product replacement. We will also not be liable for the removal or damage of any other product while gaining access to the faulty product.

11. If a product is no longer in manufacture and we cannot supply the identical product, or suitable component, we will offer to replace with the nearest product from our range.

12. We may offer a site visit if deemed necessary, however a deposit will be taken in advance in the case the visit reveals the product not to be at fault.

13. The guarantee is in addition to, and does not affect, your statutory rights

- Exclusions
1. Damage caused by lime scale, mildew, chemicals, or inappropriate cleaning
 2. Consequential damage
 3. Glass breakage after installation
 4. Product modification
 5. Fixing of mirrors
 - 6.If you are painting your own unit, the paint finish would not be covered under out guarantee, speak to the painter to see if they provided a third-party guarantee.
 - 7.The freestanding bath paint finish (excluding gloss white) is only guaranteed for 12 months.
